The Polish manufacturer of quantum software company BOHR opened office in Canada

2018-11-16 05:10:37

Polish start-up BOHR Technology, producer of algorithms and software for quantum computers, enters the Canadian market opening its office in Toronto last September. Supported by Toronto Trade Office, BOHR will cooperate with the main players of the Canadian market and extend the portfolio for the clients in North America.

BOHR (Bohr Technology Inc.) is a company that works on quantum machine learning algorithms and software for solving complex optimization problems across various industries. BOHR was launched with the goal of mixing classical AI and state-of-the-art quantum algorithms to enable the use of Quantum Computers for solving complex optimization problems in the mobility, transportation, energy, finance, insurance and manufacturing industry. It brings together a group of leading quantum programming, quantum physics and AI/Machine Learning specialists to work on industry altering quantum optimization applications.
